

Remarks:

The amendments entered to the claims are believed to provide a substantive response to the Examiner's restriction requirement. The applicant presents this paper new claims 34 – 44 which are all interdependent, namely claims 35 – 44 are all dependent claims from claim 33.

The applicant TRAVERSES the Examiner's restriction requirement and point out that there is sufficient common subject matter in the claims, viz. the "additive" which provides a basis for a common unified search of the subject matter of all of the claims which are currently pending.

The applicant has indicated that claims 14 – 27 are "withdrawn" from consideration and the applicant traverses the Examiner's suggestion that these claims should be canceled. The applicant reserves these claims in the application in order to permit consideration by the Examiner to rejoin one or more of said claims following a determination of patentable subject matter in any of the claims 34 – 44 which are presented in this paper.

Should the Examiner in charge of this application believe that communication with the undersigned will favorably advance the prosecution of this application, they are invited to contact the undersigned at their convenience.
